FIRST MACHINE IN THE WORLD TO HAVE A PARALLEL LEG MOTORIZED VARYING BASE THAT ALLOWS TO WORK EFFICIENTLY IN SMALLER SPACES

FEATURE LIST

FEATURE	STANDARD RANGE	EXTENDED RANGE
LIFT CAPACITY	130 kgs	200 kgs
RANGE OF VERTICAL MOVEMENT	1200 MM	NOT APPLICABLE
SYSTEM HEIGHT	1700 MM	NOT APPLICABLE
SYSTEM WIDTH	640 MM	NOT APPLICABLE
WHEEL SIZE	100 MM CASTORS	ON REQUEST
CLEARNECE UNDER BED REQUIRED	170 MM ATLEAST	CAN BE REDUCED TO 150 MM IN REQUEST
LEG LENGTH	1250 MM	NOT APPLICABLE
WEIGHT OF SYSTEM	70 KGS APPROX	NOT APPLICABLE
BATTERY UNIT CAPACITY	UPTO 15 LIFTS PER CHARGE OR MORE	NOT APPLICABLE
OPEN LEG PARALLEL WIDTH THROUGHOUT	940MM	NOT APPLICABLE
SLING	AVAILABLE IN M, L AND XL SIZE	XXL ON REQUEST

REMOTE & BATTERY BOX WITH INDICATOR & EMERGENCY STOP BUTTON MOUNTED TO BACK OF THE DEVICE.

OVERALL DEVICE IN RAISED POSITION.

SPECIAL FEATURE

UNWEIGHING SYSTEM TO ALLOW WALKING EXERCISES

Patients with lower or no lower body strength can be supported through this system using an ADDITIONAL Stand UP Sling that can be ordered with the device. This enables to put partial weight on person's legs and allow walking exercises. With use of an OPTIONAL WEIGHING SCALE the user can also decide what percent of load needs to be put on legs. This can hence be an important tool for maintaining muscular vitality and enabling rehabilitation training in patients whose motor control abilities have been hindered.

Figure on right illustrates a nursing aid coaxing the patient to try and walk with partial load of self on the legs. A weighing digital scale as shown below can be integrated to help identify the extent of 'unweighing'.

UNIQUE FEATURES OF THE PATIENT LIFT

PROMOTES BETTER EMPLOYEE PRODUCTIVITY :

Takes away need for extra hands to effect transfer
No Strain on the back -> Better employee productivity
Better Nurse as well as patient morale !

IMPROVES DIGNITY OF PATIENT :

Patient not lifted and carried like a sack
Better poise and posture : hence more safe and error free
Can avoid use of Bed Pan for defecation : better morale
Comfortable movement for various tests and visits

UNIQUE "PARALLEL LEG" VARIABLE BASE:

Allows passing through the narrowest of doors
Can widen up to accommodate big wheelchairs/sofas

UNIQUE STABILIZING BAR WITH RATCHET LOCK

No swing during movement patient remains steady
Patient can be postured to convenient position

UNWEIGHING ACCESORY FOR PHYSIOTHERAPY & REHABILITATION

Secure stand-up sling to stabilize patient
Patient can perform walking exercises with no support
Extent of load on legs can be varied and measured
